All GENECLEAN® III reagents are stable at room temperature. Nal solution must be kept away from light and open air sources to prevent oxidation. Nal is packaged under nitrogen gas to further reduce chance of oxidation. Purging Nal's bottle with nitrogen gas is a preferred storage method after opening, especially for long-term storage. Ensure that the Nal cap is always very tight. Sealing the cap after opening and during long-term storage is also recommended. See the provided Kit Manual for further indications of Nal. Shelf life may be extended by storing at 4°C.
